Association

What is GESPA/USEA?

The Granite Education Support Professionals Association (GESPA) is a local unit of the Utah School Employees Association (USEA). Just as the Granite Education Association (GEA) advocates for teachers and certified employees in the Granite School District, GESPA advocates for the classified employees, also known as ESPs, in the Granite School District. This includes negotiating for classified employees, representing their members on district committees, advocating for quality working conditions, and more.

USEA represents classified employees at the state level, including USBE and the legislature, similar to how the Utah Education Association (UEA) represents teachers and certified employees.
